

In keeping with my 2015 wish for you to have a wonder-filled year, I present you with:

THE WONDER WHEEL!

Science begins with a sense of curiosity-- a sense of wonder. This tool helps jump start the scientific process* by helping students frame their questions. I came across this wheel in my older son's 4th grade science class back in 2008 and begged the teacher for a copy. I don't think she created this, though. I'd happily credit the original source if I knew who it was.

Directions:

1. Print and cut out each circle.
2. Place the smaller circle on top of the larger one.
3. Pin them together with a pin or brad.
4. Rotate the inner circle, choose a question, and start researching!

Kim

The Maker Mom

*It's good for engineering and personal problem solving, too!
